VALTRA SMARTTOUCH

VALTRA

reddot award 2017
winner

MACHINE OF
THE YEAR 2018

MACHINE
OF THE YEAR 2017

"This down to the new SmartTouch driving concept – The Finns wanted to develop the best and easiest user interface in the industry."

"VERSU GOES LIKE A TRAIN"

"YOU THINK YOU'RE DRIVING A CVT..."

"a simple and logical menu structure"

"GO!" MODE MAKES EVEN A BEGINNER HAPPY!"

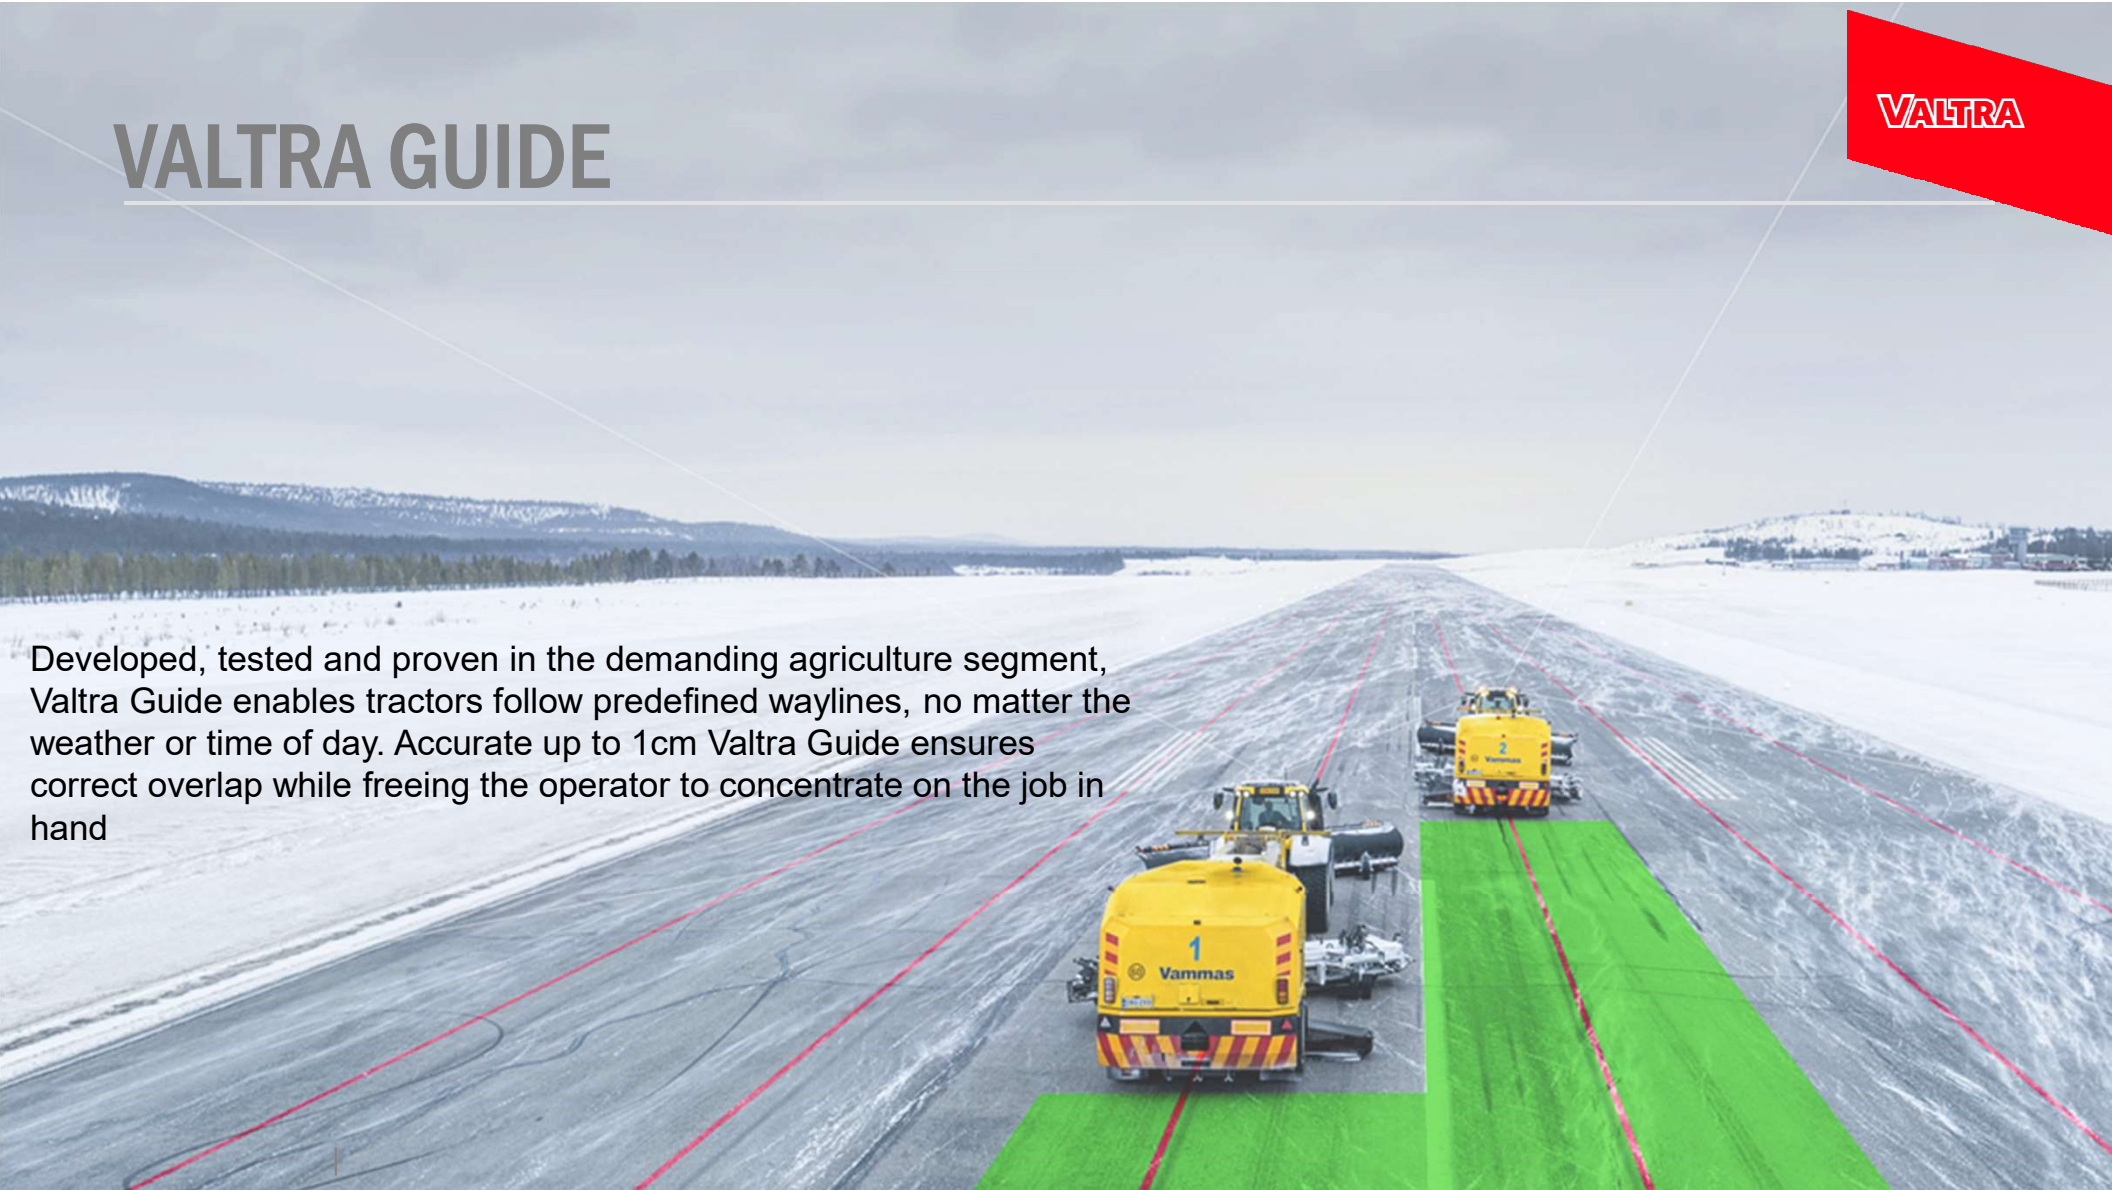

The multi-awarding winning SmartTouch armrest contains all the tractor controls right at your fingertips. The 9" touchscreen display, can be navigated with just a few taps and swipe.

VALTRA GUIDE

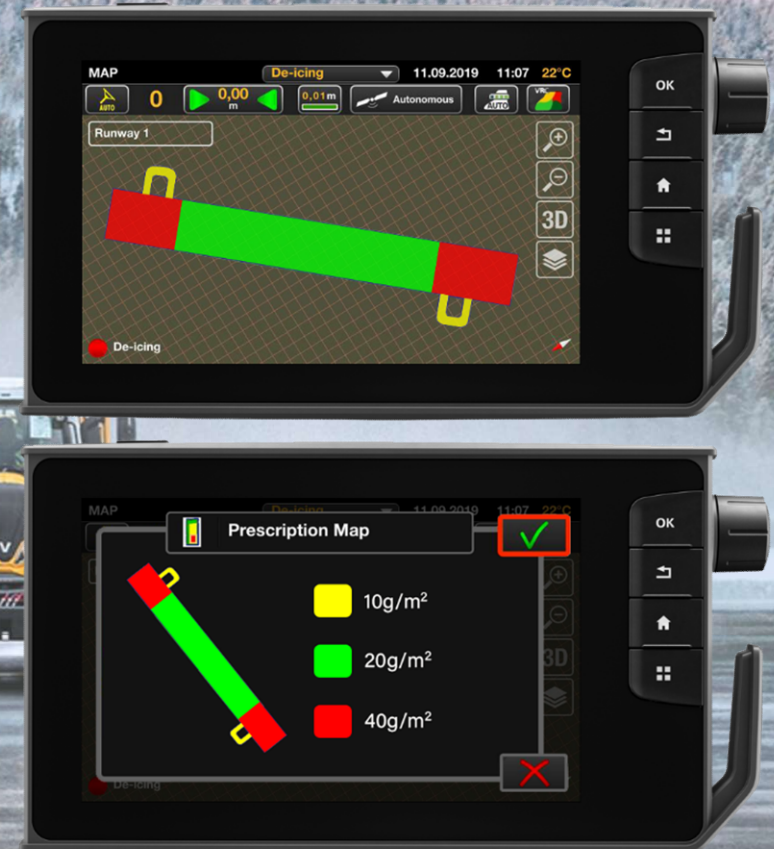

VALTRA

Developed, tested and proven in the demanding agriculture segment, Valtra Guide enables tractors follow predefined waylines, no matter the weather or time of day. Accurate up to 1cm Valtra Guide ensures correct overlap while freeing the operator to concentrate on the job in hand

SECTION CONTROL & VARIABLE RATE CONTROL

Reduce costs and apply the precise amount of de-icing chemicals you want, exactly where you want them, with zero overlap and wastage. By using Valtra's Section Control and Variable Rate Control along with a compatible ISOBUS implement – all ran through the super easy to use SmartTouch terminal.

KEEP CONNECTED

VALTRA

Valtra Connect makes fleet management easier than ever before. Machines' location, status and data signals can be viewed via desktop or smart devices. With a live link to the service centre, peace of mind is guaranteed.

VERSATILITY – IN BOTH DIRECTIONS

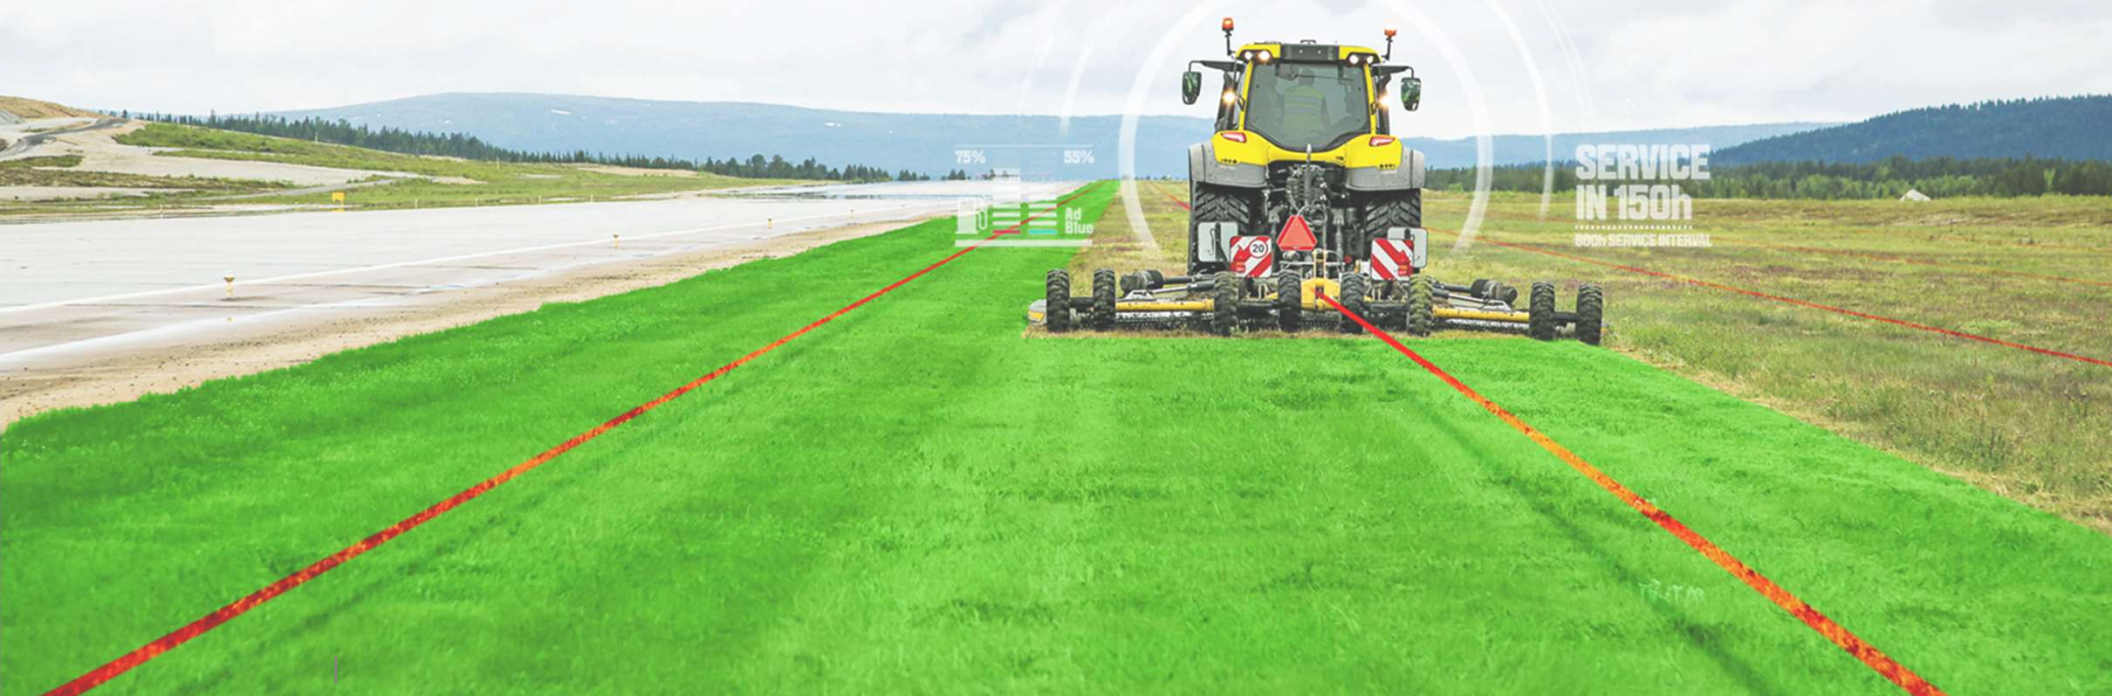

Implements can be attached both in front and behind the tractor and with Valtra TwinTrac the operators seat can be turned 180° to utilise the reverse driving steering wheel. By utilising U-Pilot, implement functions can be easily programmed into pre-defined automated sequences. Allowing the operator to complete complicated actions with the press of one button.

VALTRA

ALL YEAR ROUND

Valtra tractors may be designed in the cold Finnish winters, but that doesn't mean they need to be parked up when spring arrives. The same tractor can be used for multiple tasks all year round with virtually no extra work to change implements, reducing investment, service and training costs.
